CAREER SUMMARY

A recent graduate of the UW School of PCE's 12 week, full-stack web development bootcamp with previous CS experience, having taken several classes while an undergrad at UW. Prior to enrolling in the bootcamp, worked for 3 years as the warehouse manager of a wholesale merchandise company in Bellevue after having started with the company in a temporary seasonal capacity.

Currently looking for an opportunity to channel my newly rediscovered passion for software development and my natural tenacity for learning to build awesome tools that provide meaningful solutions.

WORK HISTORY

Warehouse Manager | Impact Merchandise | Bellevue, WA   **October 2016 – April 2019**
- Coordinated all warehouse operations for the Souvenir, Alaska, and Concessions divisions of the company
- Oversaw the relocation of main company warehouse
- Processed incoming and outgoing ground, LCL, and container load shipments
- Managed open lines of communication with our various transportation logistics partners (UPS, FedEx, Freightquote, Hyundai Marine Merchants, Freight Expeditors, Alaska Marine Lines, and others) from product production through customer merchandise requests to ensure reliable delivery of goods to customers
- Communicated frequently and effectively with company ownership and my coworkers in account management and accounting to ensure satisfactory compliance with customer needs
